Soil is a building block towards a healthy environment; it promotes growth of plants, some of which lead to food production. Maintaining a healthy soil will provide economical and functional benefits. Choices Markets Full Circle Top Soil is derived from the compost from our stores. The compostable materials from the stores are broken down over a period of 5 to 6 months, through a fully aerated static pile method, ending with the top soil that we call Full Circle! Our Full Circle Top Soil is nutrient-rich and a part of our effort to provide a sustainable option for the environment.
